Technical Skills

Programming Language: Java(Primary), JavaScript, C++
Backend: Spring Boot, Microservices, REST API, Node.js
Frontend: React, Tailwind CSS
Messaging: Apache Kafka
Databases: MYSQL, MongoDB
Tools & Platform : Git, Postman, Linux, AWS
Areas of Interest: Backend Development, Distributed Systems, Data Structures & Algorithms, Problem Solving

Experience

Software Engineer *Mumbai, India Jul 2025 – Present*
Capgemini
Microservices-based Financial System — Java, Spring Boot, Kafka

- Developed and maintained scalable microservices using Spring Boot for a financial system
- Developed and tested REST APIs ensuring reliable inter-service communication
- Implemented event-driven communication using Apache Kafka for asynchronous processing
- Collaborated on debugging and system integration

Full Stack Development Intern *Mumbai, India Dec 2024 – Mar 2025*
Talent Acquisition Services
Document Processing & OCR Pipeline System — MERN Stack, Canon SDK

- Designed and developed document processing system with OCR pipeline
- Engineered backend using Node.js for concurrent processing
- Improved OCR accuracy by 17% using ImageMagick
- Built REST APIs and React dashboard

Projects

The Reader's Circle— Java, Spring Boot, SQL, Microservices, AWS S3 The Reader's Circle

- **Developed** a full-stack platform for users to browse, review, and manage book collections.
- **Integrated AWS S3** for scalable storage of book cover images, enabling efficient upload and retrieval.
- **Developed backend services using Java and Spring Boot** for user authentication, book management, and reviews.
- **Designed REST APIs** for efficient client-server communication.
- **Built responsive UI** using React for seamless user interaction.

Word Game (Wordle Clone) — Full Stack Web Application — MERN Stack Wordle-Clone

- **Developed** a full-stack word guessing game where players have **6 attempts** to guess a hidden 5-letter word with real-time feedback.
- **Implemented game logic** to provide color-coded hints (correct, misplaced, absent) for each guess.
- **Designed and integrated** a **leaderboard system** using MongoDB to track top player performance.
- Optimized API responses for real-time gameplay and leaderboard updates.
- **Built responsive UI** using React and Tailwind CSS for smooth user experience.
- **Created REST APIs** using Node.js and Express for game state management and score tracking.

Education

Thakur College of Engineering and Technology, Mumbai *Dec 2021 – June 2025*
BE in Electronics and Computer Science: GPA: 8/10
